

Memphis Residential Utility Bill Ranks the Lowest

Each year, MLGW strives to deliver the highest quality service at the lowest possible cost. One way that we measure our performance is to examine how Memphis' average bills compare to those in other cities across the U.S. We survey approximately 55 utilities, including many that are geographically close to Memphis as well as utilities that are similar in size. All costs contained in this survey are based on rates in effect as of January 1, 2015. This survey is not based on opinion and takes into account actual published rates on record from energy providers across the nation.

Traditionally, Memphis has performed well compared to other U.S. cities in terms of average bills. Last year, Memphis had the lowest combined typical winter residential utility bill of those surveyed (combining electric, natural gas, water and wastewater services). Again this year, Memphis had the lowest bill of any city surveyed in 2015.

Last year, the typical Memphis winter residential bill was \$278.25. This year the bill decreased to \$251.06, a difference of \$27.19. MLGW's Electric cost had a slight increase, while the Water cost remained the same. The driving decrease in Memphis' bill is due to MLGW's Purchased Gas Adjustment charge decreasing with market prices.

Even with MLGW's comparatively low rates, customers can take measures to lower their bills even further. Combining a few steps such as adding insulation, caulking windows and installing a programmable thermostat can add up to big savings. To find out more on how you can save on your bill, go to www.mlgw.com/residential/energysavingtools.

The information in this book has been compiled to ensure maximum accuracy at the time of publication. Data utilized in this survey has been provided by the representative utility or calculated by Memphis Light, Gas and Water through collection of publicized rate and tariff information. Memphis Light, Gas and Water Division cannot guarantee the correctness of the information furnished and cannot be responsible for errors or omissions. For more information about the survey, please call (901) 528-4607.

We are proud to present the 2015 Utility Bill Comparisons for Selected U.S. Cities. This publication is compiled by Memphis Light, Gas and Water, a division of the City of Memphis, Tennessee. This survey compares residential, commercial, and industrial electric, natural gas, water and wastewater bills at various usage levels with rates in effect on January 1, 2015. Only FIRM RATES are used in the calculations of the bills. Cities were selected on the basis of size and geographic location.

The following guidelines were used in providing the utility figures:

- Taxes not booked as revenue by the utility are excluded.
- Special discounts for early payment are excluded.
- Seasonal rates are used when applicable.
- Calculations are based on monthly consumption.
- Special rates are not used for electric space heating and water heating.

ABOUT MLGW

Memphis Light, Gas and Water Division (MLGW) is the largest three-service municipal utility system in the nation. It is the distributor of electricity, natural gas and water within Memphis and Shelby County.

ELECTRICITY

MLGW purchases electricity from the Tennessee Valley Authority (TVA), a federal agency that sells electricity on a non-profit basis to its 158 distributors. MLGW is TVA's largest distributor, purchasing approximately 11 percent of TVA's power. There are four different connection points with TVA. MLGW's peak system demand is approximately 3,600,000 kilowatts. MLGW serves approximately 427,000 electric customers.

NATURAL GAS

MLGW currently purchases natural gas and transports it across three open-access pipeline companies, Texas Gas Transmission Corporation, ANR Pipeline Company and Trunkline Gas Company. MLGW furnishes over 30 billion cubic feet of gas per year to its 314,500 gas customers. MLGW has adequate natural gas under contract to supply the present needs of its customers plus substantially higher demands. Large industrial customers have the option of firm service, interruptible service or transportation service for privately purchased gas. By offering a variety of purchase options, MLGW has been able to keep residential, commercial and industrial gas rates extremely competitive with other major U.S. cities.

ARTESIAN WATER

MLGW owns and operates one of the largest artesian water systems in the world. On a peak day, MLGW can deliver approximately 250 million gallons of water to more than 250,000 customers. In the layer of waterbearing sands beneath the city, there is an abundant supply of naturally pure, high-quality water that will accommodate the daily needs of a city several times the size of Memphis.

WASTEWATER

Wastewater treatment facilities are provided by the City of Memphis Public Works Department. Total system treatment capacity is 225 million gallons (MGD) per day. Currently, the daily usage throughout the system stands at about 165 million gallons per day, well below capacity.

IN LGW has the necessary facilities to supply the utility needs of the growing Memphis economy. MLGW is proud to provide these services in the community at one of the lowest combined utility rates in the nation. The MLGW Economic Development Department works in partnership with the Memphis Area Chamber of Commerce to promote commercial and industrial development in Memphis and Shelby County by encouraging and facilitating the expansion of local industry and the relocation of new industry. The economic growth and development of the Memphis community is a primary concern of MLGW as it strives to improve the quality of life for all of its customers.
