

March 30, 2016

Name  
Address  
City, St Zip

Dear :

Our records indicate that your certification for testing backflow prevention assemblies is due to expire on **12/12/13**. Therefore, in keeping with our efforts to maintain a safe drinking water supply and also in following Tennessee Dept. of Health and Environment guidelines regarding certified testers, MLGW is offering a one (1) day recertification class which will be conducted on the following dates:

<u>CLASS DATES IN 2015</u>	<u>DAY OF CLASS</u>	<u>REGISTRATION DEADLINE</u>
1. January 22, 2016	Friday	January 15, 2016
2. March 11, 2016	Friday	March 4, 2016
3. March 24, 2016	Thursday	March 18, 2016
4. May 20, 2016	Friday	May 13, 2016
5. July 8, 2016	Friday	July 1, 2016
6. July 22, 2016	Friday	July 15, 2016
7. September 16, 2016	Friday	September 9, 2016
8. November 18, 2016	Friday	November 4, 2016

The class is scheduled from 8:00 a.m. to 4:30 p.m. **The fee is \$100. Checks should be made payable to MLGW.** The classes will be held at The Cross Connection Training Lab located at Mallory Pumping Station at 488 N. Dunlap St, Memphis, TN 38105.

The State requires that any person taking the Cross Connection Control Renewal tests submit **a \$60 fee made payable to Treasurer, State of Tennessee.** This fee will be mailed to the State with the practical tests and registration form by the MLGW Cross Connection Department. If you should have any questions regarding this fee, please contact Fleming Training Center at 615-898-6501. **Please call the MLGW Cross Connection area at 901-528-7757 to register.**

In order to give each participant the individual attention needed, each class will be limited to 12 (twelve) students on a **first-come, first-serve basis. Therefore, payment must be received prior to the class date.**

This short, intensive refresher course is designed to inform testers of new changes and requirements by the Memphis and Shelby County Cross Connection Board. Ample laboratory time will be allowed for getting reacquainted with testing procedures for the Reduced Pressure and Double Check Valve Assemblies. To assist with the practical exercises **please bring a flathead screwdriver and your test kit.** If you do not have a test kit, one will be provided for you to use for practice. Although a written exam will not be administered, practical tests will be given on the RP and DCVA at the end of class.

Sincerely,

Cross Connection Coordinator
