

MLGW's Backflow Testing Procedures and Guidelines

All backflow devices for irrigation and multi-tenant commercial facility systems must be tested annually. Fire protection systems require semi-annual inspections.

Only licensed or master plumbers can repair, replace, remove or install backflow devices. A testing company can determine if a backflow device passes or fails inspection. The Memphis and Shelby County Office of Construction Code Enforcement requires a permit for any job where a backflow device must be repaired, replaced, removed or installed.

The following companies and individuals have successfully completed all the requirements as set by MLGW to test backflow devices.

DISCLAIMER: This list is not an endorsement of any firm, nor is it a guarantee/warranty of their work. While we strive to make sure the list is timely and accurate, MLGW makes no guarantees for any errors or omissions.
