

**MEMPHIS LIGHT, GAS AND WATER DIVISION
CITY OF MEMPHIS
ELECTRIC SERVICE SCHEDULE SGS**

SEASONAL DEMAND AND ENERGY GENERAL SERVICE

AVAILABILITY

This schedule shall apply to the firm electric power requirements of a customer where the following conditions are met.

Unless otherwise provided for in a written agreement between TVA and the Division, for customers served under this schedule, the customer's "meter-reading time" shall be 0000 hours CST or CDT, whichever is currently effective, on the first day of the calendar month following the month for which a bill under this schedule is being calculated. Further, in accordance with TVA furnished or approved guidelines or specifications, TVA shall have unrestricted remote access to the metering data at all times, as well as unrestricted physical access to the metering facilities for the purpose of confirming remotely-accessed data during such periods as are specified by TVA.

Electricity supplied under this schedule is for the exclusive use of the Customer and shall not be resold or shared with others.

CUSTOMERS CLASS DESCRIPTION

The Division shall require contracts for all service provided under this schedule. Customers are categorized into the following classes based on customer's current effective contract demand. The following designation determines the applicable billing rate and contract terms.

<u>Rate Class</u>	<u>greater than</u>	<u>but not more than</u>
SGSB	5,000 kW	15,000 kW
SGSC	15,000 kW	25,000 kW
SGSD	25,000 kW	

CHARACTER OF SERVICE

The service supplied shall be 60 hertz alternating current, single phase or three-phase. Power shall be delivered at a transmission voltage of 161 KV or, if such transmission voltage is not available, at the highest voltage available in the vicinity, unless at the customer's request a lower standard voltage is agreed upon.

TENNESSEE VALLEY AUTHORITY FUEL COST AND PURCHASED POWER ADJUSTMENT RIDER

The rates included within are subject to adjustment under the provisions of the Tennessee Valley Authority Fuel Cost and Purchased Power Adjustment Rider (FCA). The FCA rates are published monthly and can be accessed through www.mlgw.com.

ADJUSTMENT

The base demand and energy charges shall be increased or decreased in accordance with the current Adjustment Addendum published by TVA. In addition, such charges shall be increased or decreased to correspond to increases or decreases determined by TVA in the value of the hydro generation benefit allocated to residential customers.

Loss adjustments are made to retail rates and to the monthly FCA adjustment under the Adjustment Addendum to recognize additional distribution cost of providing service to the retail customers. The loss factors applied to customers that take service at transmission voltages of 115 kV or higher shall be set to 0%.

DETERMINATION OF SEASONAL PERIODS

Summer Period shall mean the June, July, August, and September billing months. Winter Period shall mean the December, January, February, and March billing months. Transition Period shall mean the April, May, October, and November billing months.

DETERMINATION OF DEMAND

The Division shall meter the demands in kW of all customers served under this schedule. The metered demand for any month shall be the highest average during any 30-consecutive-minute period beginning or ending on a clock hour of the month of the load metered in kW, and such amount shall be used as the billing demand, except that the billing demand for any month shall in no case be less than 110% of the sum of (1) 30 percent of the first 5,000 kW, (2) 40 percent of the next 20,000 kW, (3) 50 percent of the next 25,000 kW, (4) 60 percent of the next 50,000 kW, (5) 70 percent of the next 100,000 kW, (6) 80 percent of the next 150,000 kW, and (7) 85 percent of all kW in excess of 350,000 kW of the higher of the currently effective contract demand or the highest billing demand established during the preceding 12 months.

FACILITIES RENTAL CHARGE

There shall be no facilities rental charge under this schedule for delivery at transmission voltage levels of 161 kV or higher.

For delivery at less than 161 kV, there shall be added to the customer's bill a facilities rental charge. This charge shall be \$0.38 per kW per month except for delivery at voltages below 46 kV, in which case the charge shall be \$0.97 per kW per month for the first 10,000 kW and \$0.76 per kW per month for the excess over 10,000 kW. Such charge shall be applied to the higher of (1) the highest billing demand established during the latest 12-consecutive-month period or (2) the customer's currently effective contract demand and shall be in addition to all other charges under this schedule, including minimum bill charges.

REACTIVE DEMAND CHARGES

If the reactive demand (in kVAR) is lagging during the 30-consecutive-minute period in which the customer's highest metered demand occurs, there shall be added to the customer's bill a reactive charge of \$1.45 per kVAR of the amount, if any, by which the reactive demand exceeds 33 percent of such metered demand. If the reactive demand (in kVAR) is leading during the 30-consecutive-minute period in which the customer's lowest metered demand (excluding any metered demands which are less than 25 percent of the highest metered demand) occurs, there shall be added to the customer's bill a reactive charge of \$1.14 per kVAR of the amount of reactive demand. Such charges shall be in addition to all other charges under this schedule, including minimum bill charges.

MINIMUM MONTHLY BILL

The monthly bill under this schedule, excluding any facilities rental charges and any reactive charges, shall not be less than the sum of (1) the base service and TVA administrative charges, (2) the base demand charge, as adjusted (but excluding the additional portion thereof applicable to excess of billing demand over contract demand) applied to the customer's billing demand, and (3) the base energy charge, as adjusted, applied to the customer's energy takings.

The Division may require minimum bills higher than those stated above.

CONTRACT REQUIREMENT

Under the SGSB, SGSC and SGSD rates, the contract shall be for an initial term of at least 5 years and any renewals or extensions of the initial contract shall be for a term of at least 5 years. After 10 years of service, any such contract for the renewal or extension of service may provide for termination upon not less than a 16-month notice.

The customer shall contract for its maximum requirements, which shall not exceed the amount of power capable of being used by customer, and the Division shall not be obligated to supply power in greater amount at any time than the customer's currently effective contract demand. If the customer uses any power other than that supplied by the Division under this schedule, the contract may include other special provisions. The schedule in any power contract shall be subject to adjustment, modification, change, or replacement from time to time as provided under the power contract between the Division and TVA.

After having received service for at least one year under this schedule, the customer, subject to appropriate amendments in its power contract with the Division, may receive service under the Time of Use General Service Schedule. In such case the term of the power contract shall remain the same and the on-peak contract demand for service under the Time of Use General Service Schedule shall not be less than the contract demand in effect when service was taken under this schedule.

PAYMENT

Rates and charges included within are net. In the event that any bill is not paid on or before the delinquent date shown on bill, there shall be added to the bill an amount equal to 5 percent on the first \$250.00 of the bill plus one percent on any portion of the bill exceeding \$250.00; to any amount remaining unpaid 30 days after the delinquent date of the bill, there shall be added a penalty of one percent, and an additional one percent shall be added at the end of each successive 30-day period until the amount is paid in full.

SINGLE-POINT DELIVERY

The charges under this schedule are based upon the supply of service through a single delivery and metering point, and at a single voltage. If service is supplied to the same customer through more than one point of delivery or at different voltages, the supply of service at each delivery and metering point and at each different voltage shall be separately metered and billed.

CURRENT EFFECTIVE BASE RATES

All charges are on a per month basis.

Service Charge per delivery point: \$1,500.00
 TVA Administrative Charge per delivery point: \$350.00

Rates applicable for delivery at:	Transmission Voltage: 115 kV and up			Distribution Voltage: <115 kV		
Summer	SGSB	SGSC	SGSD	SGSB	SGSC	SGSD
Billing demand per kW:	\$19.39	\$18.86	\$18.61	\$19.93	\$19.40	\$19.15
Excess demand per kW:	\$19.39	\$18.86	\$18.61	\$19.93	\$19.40	\$19.15
Energy charge per kWh:	\$0.02990	\$0.02934	\$0.02618	\$0.03076	\$0.03018	\$0.02695
Winter						
Billing demand per kW:	\$16.40	\$15.87	\$15.62	\$16.85	\$16.32	\$16.07
Excess demand per kW:	\$16.40	\$15.87	\$15.62	\$16.85	\$16.32	\$16.07
Energy charge per kWh:	\$0.02561	\$0.02495	\$0.02236	\$0.02634	\$0.02566	\$0.02302
Transition						
Billing demand per kW:	\$13.42	\$12.89	\$12.64	\$13.78	\$13.25	\$13.00
Excess demand per kW:	\$13.42	\$12.89	\$12.64	\$13.78	\$13.25	\$13.00
Energy charge per kWh:	\$0.02464	\$0.02402	\$0.02151	\$0.02534	\$0.02470	\$0.02214

Excess Demand: Demand amount that exceeds the effective contract demand.

Service is subject to Rules and Regulations of the Division.
