

Preventing outages and ensuring safety...

At MLGW, we know that few things are more inconvenient to you than a power outage. We also know that there are few things more dangerous than a downed power line on your property.

That's why we do everything we can to prevent this from happening.

MLGW has a focused tree trimming program in place to protect you from power outages caused by fallen limbs, which is the leading cause of power outages in the city. Just one fallen tree limb can cause thousands of homes to be without power.

MLGW contractors are now in the process of trimming and removing trees in your area for necessary clearance of electric lines. Because the Memphis climate is ideal for heavy growth, trees must be trimmed so that clearance is maintained for three to five years. If you would like trees to be removed instead of trimmed, please call.

We take our responsibility to our customers very seriously and maintain our tree trimming efforts to ensure safe, reliable and affordable utility services for you now and in the future.

For more information on our tree trimming policy, visit us online at mlgw.com/treetrimming.

If you have any questions concerning MLGW's line clearance policies, call (901) 544-6549.
