

The Cause of Your High Summer Utility Bill

This summer Memphis Light, Gas and Water customers are experiencing a 20% to 40% increase in their electricity bills due to a recent Tennessee Valley Authority fuel cost adjustment as well as increased electricity consumption. As the summer season begins to wrap up, here are some tips to save money on your next bill.

- Set ceiling fans to turn counterclockwise, so they push down cool air and create a breeze.
- Turn the AC up or off if you are going to be away from home for more than four hours.

To find more energy conservation tips, visit mlgw.com/summertips.

INCREASED FUEL COSTS GENERATE HIGHER ELECTRIC BILLS.

Now through September, customers could see 20% to 40% increases on average, depending on consumption. Find ways to save.

Craigmont Middle School Sign Unveiling

Craigmont Middle School is MLGW's Adopt-a-School and on Friday, August 5, MLGW leadership, alongside school administrators, and school board members unveiled a new electronic sign in front of the school. The new sign bears the school's name and team logo. It also bears an MLGW logo and digital text that reads "Thank You MLGW Family for Your Commitment to Craigmont Middle and the Memphis Shelby County Schools Community."

Craigmont teachers and students helped celebrate the new sign. The school's principal presented President Young with a certificate of appreciation and a lovely swag bag filled with a Craigmont Middle T-shirt, hoodie, and other fun items.

The City of Memphis is Getting New LED Streetlights

Starting next month, Memphis Light, Gas and Water, and the City of Memphis are launching an aggressive new \$42 million project to replace more than 84,000 high-pressure sodium, or "cobra," streetlights that were installed in the 1950s with new LED lights. Mayor Jim Strickland and MLGW President and CEO J.T. Young made the announcement at a press conference on August 3, 2022. "Improved lighting improves safety" in every neighborhood in Memphis, Mayor Strickland said. "With these new lights, no longer will criminals have a safe harbor to operate under cover of darkness. People will feel safer on their streets." President Young predicts a 55% energy savings in street lighting "reducing our greenhouse footprint." The project is expected to start in September and finish by the fall of 2023.
