

Enter the 2026 MLGW

AQUA VOLT

Art Contest

WATER MANE

SOL-MAN

Grab your paints, brushes, colored pencils, crayons and even computers, to create the image of MLGW's Power League Superhero, "Aqua Volt!"

⚡ ABOUT AQUA VOLT ⚡

Before Aqua Volt joined the Power League, he was Miles Rivers, a science teacher who became a trainer at MLGW University. Miles loved nature—the power of storms, the movement of rivers, and the energy that surrounds us every day. One day, while walking along the Mississippi River, Miles discovered the incredible power of moving water and how it could create renewable energy.

From that day forward, Miles Rivers became "Aqua Volt", the Power League hero who harnesses the power of water to create electricity and teaches the community about hydroelectric energy.

For 2026, students can create the next MLGW Power League Superhero, "Aqua Volt."

Teachers and students can win a \$125 prize!

Open to all K-12 students

Submission deadline: **Friday, December 11, 2026.**

For more information, please send an email to bonita.anderson@mlgw.org.
