

2026 Utility Bill Comparisons

for Selected Cities
Rates in effect January 2026

Survey History

The largest three-service municipal utility system in the nation, MLGW delivers electricity, natural gas and water throughout Memphis and Shelby County. Each year we strive to not only deliver the best possible price, but also the highest quality service.

We surveyed 39 cities, including many that are geographically close to Memphis, as well as utilities that are similar in size to MLGW. All costs covered in this survey are based on published rates effective January 2026.

MLGW started collecting data on rates in 1991. Memphis continues to outperform many cities in terms of what customers pay for electricity, natural gas and water services. MLGW's financial management remains a driving force in keeping utility bills as low as possible.

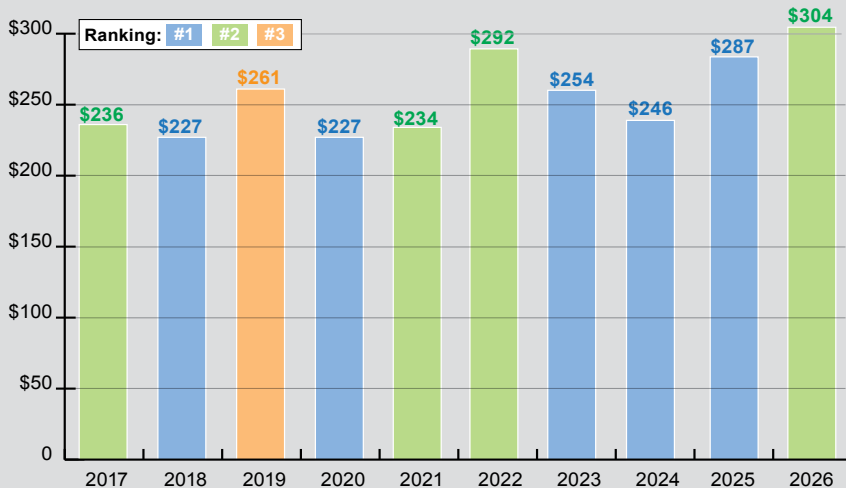

We are proud to present the 2026 Utility Bill Comparisons for Selected Cities. MLGW, a division of the City of Memphis, compiled the data. The survey compares residential, commercial and industrial electric, gas and water bills at various usage levels with rates in effect January 2026. **Only FIRM RATES are used.**

- Residential Water Bills — 12
- General Service Water Bills — 13
- Grow with Us — 14
- Appendix — 15

Memphis: 10 Years Among Lowest Winter Utility Bills

Historically, Memphis customers have spent less for their winter utility bills than their counterparts in many metro areas, capturing the top ranking 21 times since 1991. The 2026 ranking includes what a homeowner would pay for 1,000 kilowatt-hours (kWh) of electricity, 200 hundred cubic feet (CCF) of gas and 10 CCF of water. Dollar amounts have been rounded.

Participating Cities:

Guidelines used in providing the utility figures:

- Calculations are based on monthly consumption.
- Seasonal rates are used when applicable.
- Special early payment discounts are excluded.
- Time differentiated rates were excluded.
- Taxes not booked as revenue by the utility are excluded.
- Special rates are not used for electric space heating and water heating.

The information in this book has been compiled to ensure maximum accuracy at the time of publication. Representative utilities provided the data, or MLGW calculated the rates through the collection of publicized rate and tariff information. MLGW cannot guarantee the correctness of the information furnished and cannot be responsible for errors or omissions. For more information about the survey, please call 901-528-4607.

Disclaimer: MLGW collects sewer fees as a courtesy to the City of Memphis.

ELECTRICITY

MLGW buys electricity from the Tennessee Valley Authority. TVA sells its power on a non-profit basis to 153 local power companies. As TVA's largest customer, MLGW purchases 10 percent of TVA's power.

MLGW owns and maintains over 600 miles of transmission lines and four connection points or substations with TVA. The utility company is capable of meeting peak system demands of up to 3.6 million kilowatts for its 446,000 electric customers.

In 2024, the American Public Power Association's Reliable Public Power Provider program gave MLGW its highest ranking – Diamond level status – which lasts for three years.

Overhead transmission structure miles

453

Overhead transmission circuit miles

626

Underground transmission circuit miles

17.6

100 Watt x 10 x 1hr = 1kw hour

One kilowatt-hour equals ten 100-watt light bulbs staying on for an hour.

After several years of playing catch up, MLGW's tree trimming crews are now back on a three-year trimming cycle. Their efforts help reduce power outages and improve service reliability for our customers.

NATURAL GAS

MLGW currently buys natural gas and moves it via three interstate pipeline companies, Texas Gas Transmission Corp., ANR Pipeline Co. and Trunkline Gas Co. MLGW supplies 317,000 gas customers with 37 billion cubic feet of gas a year purchased from more than 30 suppliers.

In addition to natural gas, MLGW also operates a wholesale Liquefied Natural Gas facility and two retail Compressed Natural Gas stations for our customers.

100 cubic feet

Ccf -

One hundred cubic feet is a common unit of measurement of gas volume.

4,575 miles of gas mains

201 miles of gas transmission

The Weaver-Gill Pipeline was a 5.4-mile, \$30 million modernization project to improve the pipeline distribution of natural gas in South Memphis.

ARTESIAN WATER

MLGW operates one of the largest artesian water systems in the world. On a peak day, MLGW can deliver up to 250 million gallons of water to more than 260,000 customers. In the layer of water-bearing sands beneath the city, there is an abundant supply of naturally pure, high-quality water that will meet the daily needs of a city several times the size of Memphis.

Water Analysis (Average 2025)

The Sheahan Pumping Station was built in the 1930s on an old plantation and consists of three separate buildings—one for pumping, one for aeration and another for filtering.

COME GROW WITH US

MLGW has the necessary facilities to meet the utility needs of a growing Memphis economy. The MLGW Economic and Business Development Department and the Greater Memphis Chamber of Commerce promote commercial and industrial development in our area. Both encourage and aid in the expansion of local industry and the relocation of new industry. MLGW cares about the economic growth and development of our community as we strive to improve the quality of life for all of our customers.

Water Sales

45,311,090 (100 cf)

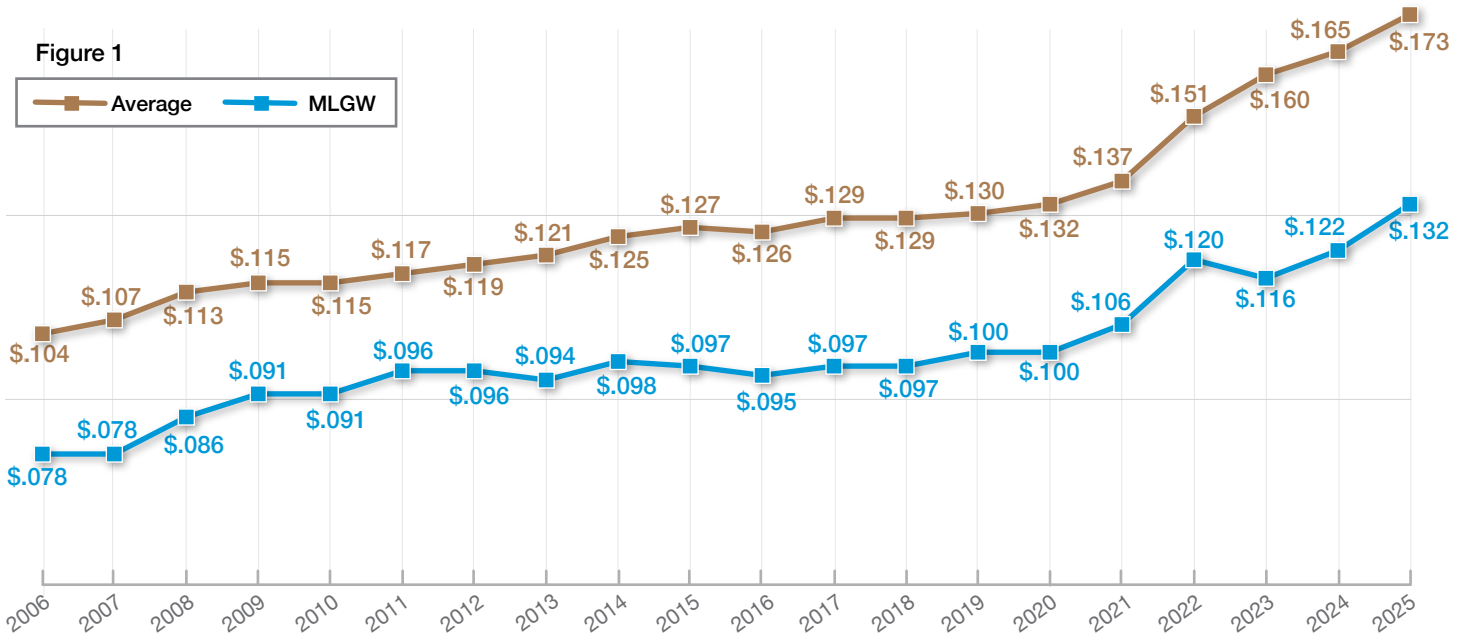

APPENDIX

Drones proved critical in MLGW's Optimizing Memphis Neighborhood Initiative (OMNI) aimed at modernizing infrastructure, enhancing service reliability and reinforcing the utility's commitment to operational excellence.

Electric users saved \$562 more than the typical U.S. user in 2025

A typical MLGW residential electric customer spent about 13 cents per kilowatt hour (kWh), whereas a typical U.S. user spent 17 cents per kilowatt hour in 2025. Figure 1 compares MLGW residential prices to the U.S. average over the past 20 years. Using an annual average of 13,699 kWh, a MLGW residential customer saved \$562 more than a typical U.S. residential customer from a sampling of 500 electric utilities.

Sources: U.S. Energy Information Administration and MLGW Annual Reports

Jeff Turner, Crew Leader, and his son Briceton Turner, Apprentice Lineman, represent two generations of utility workers.

Gas users saved \$415 more than the typical U.S. user in 2025

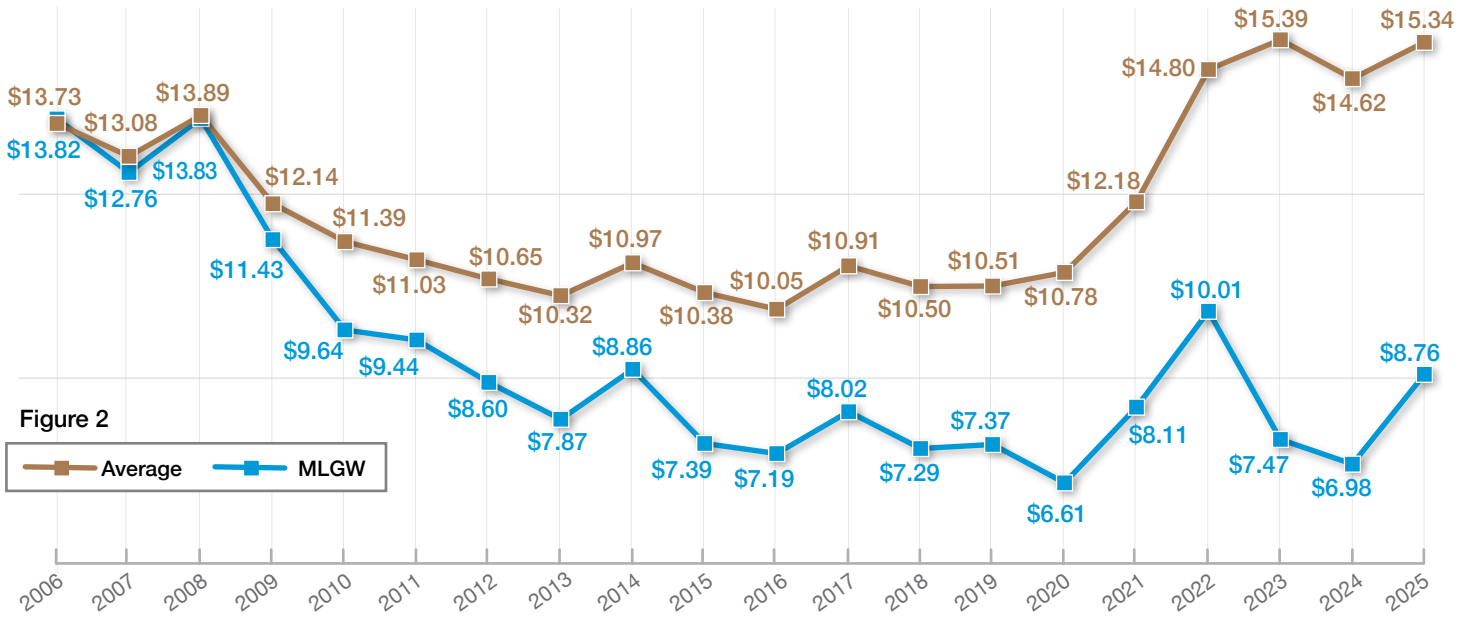

Figure 2

— Average — MLGW

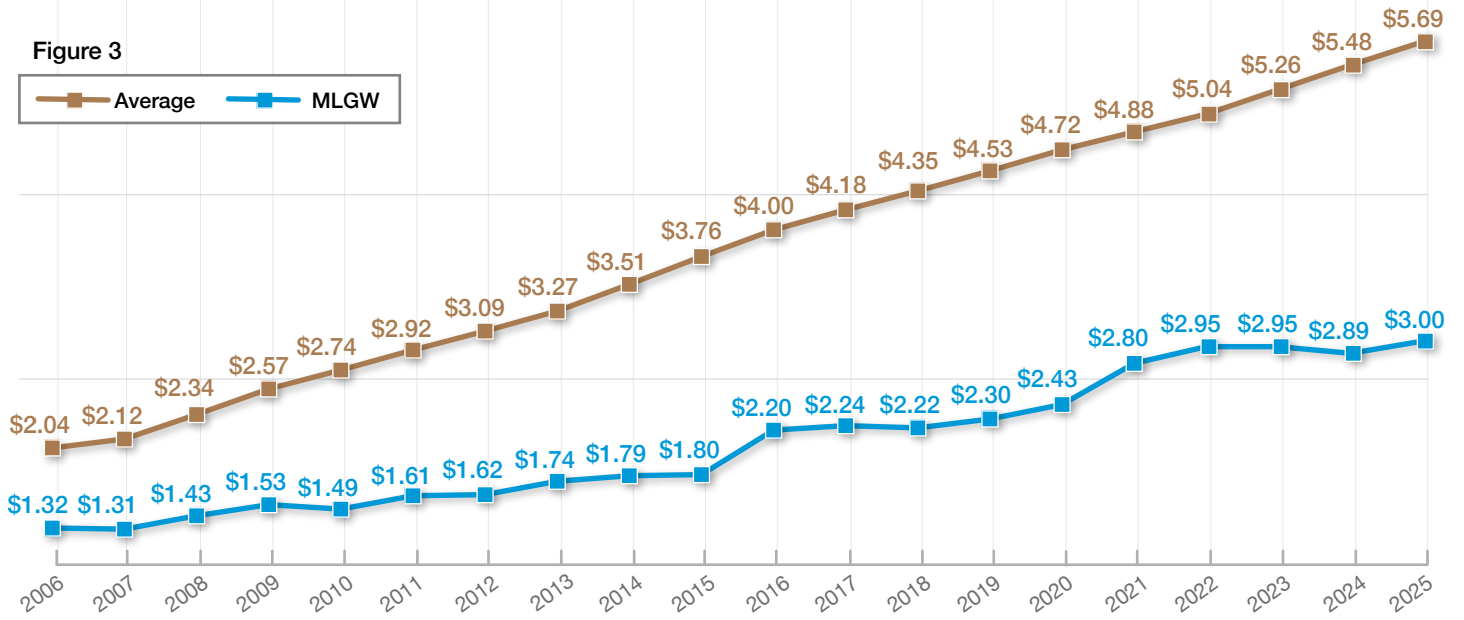

A typical MLGW residential gas customer spent about \$8.76 per one thousand cubic feet (MCF), whereas a typical U.S. user spent \$15.34 per MCF in 2025. Figure 2 compares MLGW residential prices to the U.S. average over the past 20 years. Using an annual average of 63 MCF, a MLGW residential customer saved \$415 more than a typical U.S. residential customer from a sampling of 323 U.S. gas utilities.

Sources: U.S. Energy Information Administration and MLGW Annual Reports

The Weaver-Gill pipeline—made of thicker, stronger steel pipe—is the last MLGW Way Forward capital project and one of the biggest modernization projects that MLGW has ever done.

Water users saved \$229 more than the typical U.S. user in 2025

A typical MLGW residential water customer spent about \$3.00 per one hundred cubic feet (CCF), whereas a typical U.S. user spent \$5.69 per CCF in 2025. Figure 3 compares MLGW residential prices to the U.S. average over the past 20 years. Using an annual average of 85 CCF, a MLGW residential water customer saved \$229 more than a typical U.S. residential customer from a sampling of 50 largest cities in the U.S.
